Cedar manifold inspection bulletin

VECTORNEXT / SYNTHETIC EVALUATION / FICTIONAL DATA

Scope

Synthetic engineering fixture. Audit edition: July 2031. This bulletin covers Cedar manifold types A and B.

Final inspection schedule

Type A manifold: inspect every 30 days. Type B manifold: inspect every 45 days.

Correction notice

The final July 2031 interval for the Cedar type B manifold is 45 days. The earlier 90 day draft is withdrawn and must not be used.

Other intervals

The packing seal has a 120 day replacement interval. Replacement is a different operation from the scheduled manifold inspection.
